

Polymers E

Overview

Polymers E is designed to help with managing production. Some of the major issues that plague production is having to sort through multiple excel files, and attempting to obtain correct milestone dates. Polymers E is design to resolve those issues. This will help the management team, program management team, and plant floor all be on the same page with the click of a button!

Mock Ups

Below are a few mock ups of the application, they are just a rough design and are subject to change. For the most part they accurately capture the user data, and most of, if not all of the user requirements.

3	Issue	Behind	On Time	On Time	On Time	Hold	X

2007 Proper Group International

The screenshot displays the 'Polymers Job & XXXXXX' web application. The interface includes a sidebar on the left with navigation options: Projects, General Info, Primary Tooling, Secondary Tooling, Packaging, and Admin. The main content area is titled 'Polymers Job & XXXXXX' and features a 'General Info' section. This section contains a placeholder for a logo, a 'Change Image' link, and several input fields: 'Polymers Job #', 'Tooling Job #', 'Part Description', 'Part Number', 'Program', 'Customer', 'Customer Address', 'Press', 'Assisted Date', and 'Customer/Block Timing'. Below these fields are 'PPAP' and 'SOP' sections, each with a date input and a calendar icon. A 'Show amount in weeks' link is also present. The 'Team Contacts' section at the bottom lists various roles with corresponding dropdown menus: Customer PPS/Eng, Polymers Sales, Polymers Program Mgr, Proper Tooling Eng, Proper Tooling PM, Polymers Tooling Mgr, Polymers Purchasing, Plant Process Manager, and Polymers Plant Quality. The footer of the application states '© 2017 Proper Group International'.
