

# Programming Department Overview

The programming department is currently working on multiple projects, from ToolStats 2.0 to line of business apps and everything in between. Over the last few months we've released the DRC, Data Converter, various ToolStats updates, and the Quote Bounding Box function to name a few. The next LOB application we are planning on releasing is the Proper E. The Proper E LOB application is designed to be an overview of a project from the Engineering perspective.

## Proper E Updates

### Print

The new print function in Proper E, will allow a user to print, as well as export to multiple file formats.

Dashboard Report

Job #	Customer Name	Program Name	Part Name	Program Manager	Account Manager	Job Status	Design Phase	Design Location	Design Leader	Final Design	Final Surface	Build Location	T1 Date	Post T1 Date
15178	Proper Polymers	BMW G01	Front Wheel Arch Finisher Bracket L/R	Robert Belloc	Michael Tabbutt	Kicked Off	Final Design	Warren Production	Andre Schultz	5/20/2016	5/12/2016	Warren Production	7/18/2016

## Filters

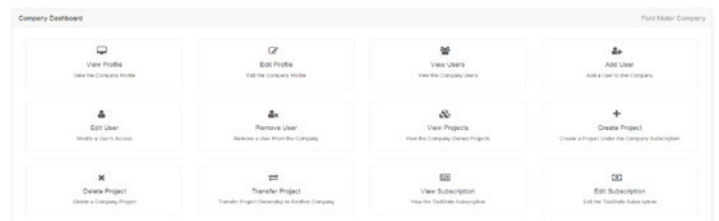

With the next release of the Proper E, users will be able to apply save and apply advanced filters.

## ToolStats

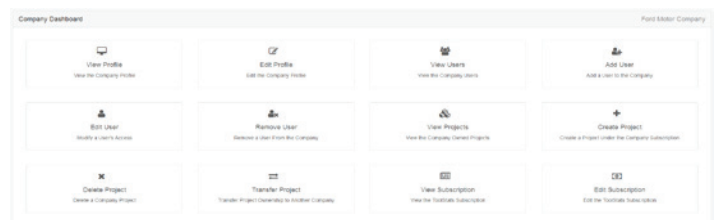

### Company Dashboard

Development is underway for the ability to manage Companies. This will allow a company access to their information, ability to Add/Edit/Delete users, transfer projects, and Edit/View subscription information.

### Project Dashboard

The Project Dashboard will allow someone to modify their project information, Add/Edit/Delete users, Add/Edit/Delete companies, and the current project status.

Need an application, have an idea for an improvement to an existing application? Please contact [softwaredev@propergroupintl.com](mailto:softwaredev@propergroupintl.com) with your ideas. Proper's software division can create full blown web/desktop apps, excel, word, power point add-ins and Cimatron functions to name a few.
